

MANISHIKA

+91-9630320074 | kkmanishika@gmail.com | [linkedin.com/in/manishika](https://www.linkedin.com/in/manishika) | github.com/manishika

Education

Amity University Noida

Bachelor of Technology in Computer Science and Engineering (CGPA: 8.18)

July 2023 – July 2027

Experience

Backend Intern — FLUXMAP

May 2025 – Oct 2025

Remote

- Design and maintain automated CI/CD pipelines via GitHub Actions, delivering zero-downtime deployments and improving release reliability.
- Engineered a production Python/Flask backend containerized with Docker and PostgreSQL; resolved live database issues and optimized queries to improve system performance and availability, working in a cooperative team environment.

Open Source Contributor — openfoodfacts-explorer

Remote

- Collaborated with a global open-source community, managing dependencies via pnpm and tracking bugs per industry best practices.

Projects

Jan-Sahayak – Autonomous Civic Action Orchestrator

[GitHub](#)

Java, Spring Boot, Python, PostgreSQL/PostGIS, Flutter, Docker

- Co-designed a decoupled, microservices-oriented architecture for a multi-agent civic-issue reporting platform following SDLC best practices; built the Java Spring Boot backend with JWT-secured RESTful service design and implementation, asynchronous event dispatch, and a Strategy-pattern image-storage service (SQL/PostgreSQL BYTEA, Cloudinary).
- Built a Python microservice orchestrating LLM-based AI agents for automated issue triage, municipal-ward routing via PostgreSQL/PostGIS geospatial queries, and SLA-based escalation.
- Deployed containerized microservices to AWS (EC2/ECS) with automated CI/CD integration pipelines via GitHub Actions, establishing scalable cloud infrastructure for a multi-agent production system.

LogPulse – AI-Powered Observability Microservice

[GitHub](#)

Java, Spring Boot, React, Google Gemini API

- Built an LLM-powered observability microservice using Spring Boot and the Google Gemini API that parses server crash logs and auto-generates executable remediation scripts, improving reliability, availability, and monitoring.
- Evaluated and applied a generative-AI model (Google Gemini) for a real-world use case, performing prompt engineering and solution experimentation; built a full-stack, object-oriented DevOps tooling solution with a decoupled React frontend for log upload and script retrieval.

Snipr – URL Shortener with Caching & Rate Limiting

[GitHub](#)

Java, Spring Boot, Redis, PostgreSQL, REST APIs, Docker

- Designed and developed a scalable URL-shortening REST API in Java/Spring Boot, implementing Base62 encoding for collision-resistant short link generation and clean RESTful service design and implementation.
- Implemented token-bucket-based rate limiting middleware to prevent API abuse and ensure fair usage across clients, and optimized PostgreSQL schema, indexing, and queries for URL-mapping and click-analytics storage applying data structures, algorithms, and software engineering best practices for scalability and reliability.

Technical Skills

Languages: : Java, Python, C++, Go (Golang), JavaScript, TypeScript, SQL, React.

Backend: Spring MVC, Spring Boot, Spring Security, Flask, FastAPI, Node.js, RESTful Service Design and Implementation.

Cloud / DevOps / Databases : AWS (EC2, ECS), CI/CD Pipelines, Docker, Maven/Gradle, PostgreSQL, Redis, SQL

AI / LLM : Large Language Models (LLMs), Generative AI, Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, AI-Assisted Development, AI Agent Workflows/Orchestration, Agentic Architecture, LLM Integration, Model Evaluation & Experimentation.

CS Fundamentals : Data Structures & Algorithms, Microservice Architecture, Software Development Life Cycle (SDLC)

Leadership & Achievement

MLH Student & RTC Member — Major League Hacking & Rewriting the Code (RTC)

- Organized and hosted technical sessions on full-stack development and DevOps methodologies for student stakeholders, demonstrating time-management and teamwork.
- Top 10 ranking in OOPS Odyssey - CodeCrux (Innovatex '25), a competitive object-oriented programming contest; completed Accenture Nordics and Deloitte Consulting job-simulation programs via Forage.
